# VARIABLE AREA FLOWMETERS STANDARD AND COMPACT SERIES

The Technical Price List EF.06 is dedicated to all the products that FIP has designed, manufactured and selected for the measurement and the control of the fluids.

It allows an easy consultation, an accurate selection of the items and a quick identification of products to make you place orders easily.

The Area Variable Flowmeters Price List includes the complete line of rotameters specific for fluids and gases flowrate measurement. The range is available in 3 materials: PVC-U, Trogamid and Polysulfone, both in standard version (FS) and in compact version (FC).

In order to meet specific needs of plants and guarantee a greater flexibility of applications the selection has been completed with Adapters, Accessories and Spare Parts.

FIP branded products distributed by Aliaxis Italia are manufactured on production sites operating according to the Quality Assurance System in compliance with ISO 9001 and with the Environmental Management System ISO 14001 standards requirements.

Aliaxis Italia offer since ever a Technical Support service for the accurate selection, installation and use of products, as well as an accurate claim service according to ISO 10002.

# FS-FC DN 10 ÷ 65

Plastic Variable Area Flowmeters in  
PVC-U , PA and PSU

# FS-FC DN 10÷65

These flowmeters operate according to the variable area principle, where a float is suspended in upward flowing media in a tapered plastic tube. The vertical position of the float within the metering tube depends on the flowrate of the media.

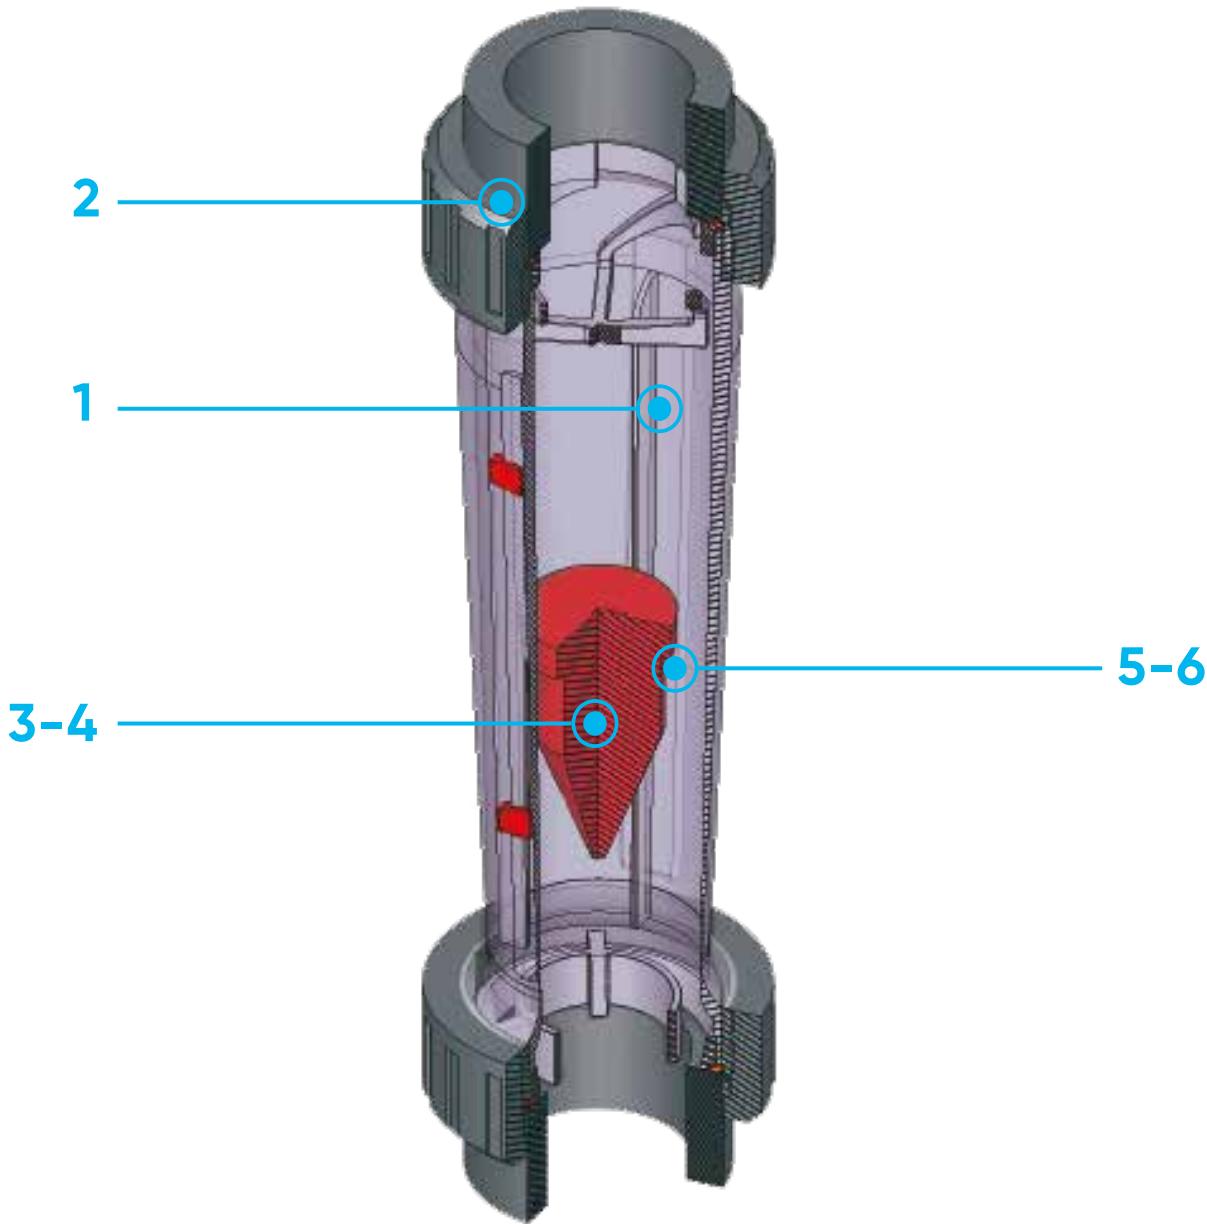

The metering tube is graduated in suitable flow units and the reading is taken in correspondence with the top edge of the float. Versions for liquids and gases are available, providing accurate and cost effective measurement with scales in l/h and Nm<sup>3</sup>/h.

## PLASTIC VARIABLE AREA FLOWMETERS

- **Wide choice of measuring scales:** water scale from 1,5 to 50.000 l/h, HCl scale from 1,4 to 23.000 l/h, NaOH 30% scale from 0,25 to 43.000 l/h, NaOH 50% scale from 0,025 to 40.000 l/h, Air scale from 0,025 to 500 Nm<sup>3</sup>/h
- **Wide choice of end connections** available in PVC-U, PVC-C, PP-H, AISI 316 SS, Carbon Steel
- Eight different diameters
- Three different plastic tube materials: PA, PVC and PSU
- Float materials available in SS and PP, with or without magnet
- **High level of accuracy:** FS accuracy class 2,5; FC accuracy class 4
- Simple operation and very limited maintenance.
- Other engineering units like LPM, m<sup>3</sup>/h or % together with **double scales and special scales** are available on request.

- 1** Metering **tubes** are available in Trogamid (PA) **suitable for most inert media**, PVC-U suitable for **slight corrosive media** and Polysulfone (PSU) suitable for **corrosive media** on an extended operating temperature range.
- 2** End connectors available in PVC-U, PVC-C, PP, SS, Malleable Cast Iron. Male threads moulded onto the end of the metering tube are used for **easy mounting of unions**. Standard unions are in PVC-U but others are available **according to the different working conditions**; Metal unions widen the range of operating conditions such as pressure and temperature.
- 3** The **floats** are available in Stainless Steel AISI 316 and in PP to match the **proper chemical compatibility** with the flow medium and to offer different measuring ranges.
- 4** **Magnetic Float option** is available to be combined with micro switches for **MIN and MAX alarm**, clamped on the guide of the flowmeter. The micro switches, housing a bi-stable reed contact are activated by the passage of the magnet incorporated into the float.
- 5** Flowmeters body are equipped with a **double guide** allowing the installation of **two alarm in a very close position**.
- 6** **Double scale option** available for specific application requirements to **customize measuring units** for an easy conversion or comprehension of the flow rate values.

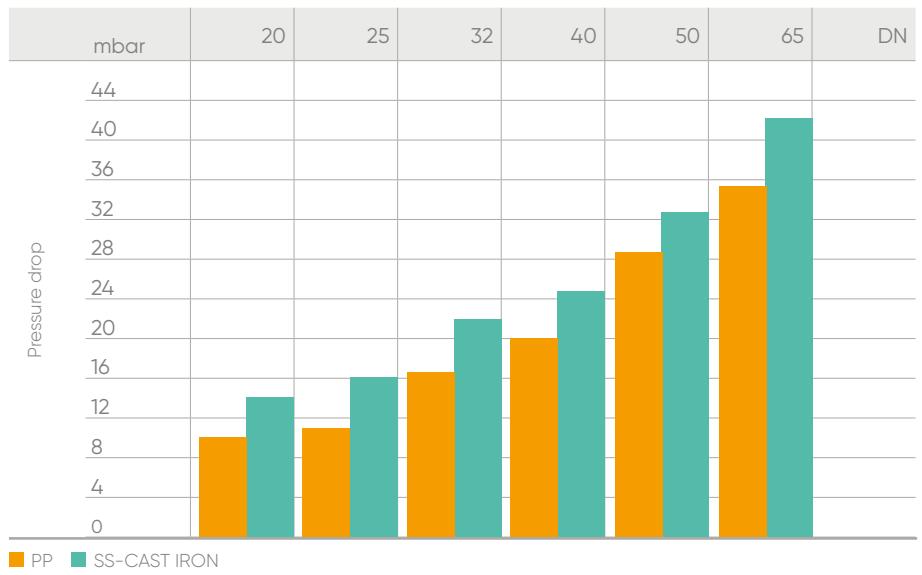

# TECHNICAL DATA

## PRESSURE VARIATION ACCORDING TO TEMPERATURE

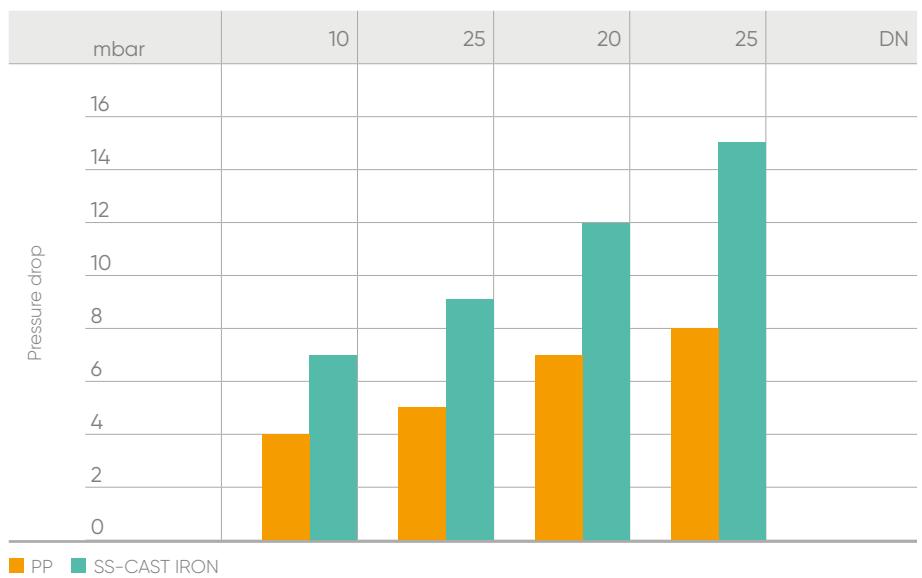

For water and harmless fluids to which the material is classified as CHEMICALLY RESISTANT. In other cases, a reduction of the nominal PN pressure is required (25 years with safety factor).

# INSTALLATION

For specific device sizes the float is inserted with a plastic net for transport lock. This must be removed through the top of the meter before installation. After that the free movement of the float inside the flow tube should be checked again.

The device must be mounted vertically and stress-free. Reductions, extensions, and control elements upstream and downstream of the meter have no influence on the measurement accuracy with liquids. For gases, however, the installation of the meter is recommended before valves to prevent compression oscillations.

Since variable flow meters are very sensitive to changes in flow, control elements should always be adjusted slowly.

The calibration is carried out for defined terms. Deviations of the density, pressure or temperature of gases, as well as density and viscosity of liquids, result in errors. It is essential to ensure compliance with the calibration conditions.

In case of medium different from the standard reference scales provided, it is essential to consider the data of the specific medium such as density and viscosity. In case of gases different from air, the exact reference point for the pressure (gauge or absolute) has to be specified.

Retrofitting of switching contacts is only possible when the floats are equipped with magnets.

- 1) The medium must flow through the flowmeter from bottom to top. Flowmeter must be mounted vertical
- 2) Inlet / outlet distances:
  - If inlet and outlet pipe DN dimensions are the same as the flowmeter DN, no inlet/outlet distances are required
  - If a bend or elbow is on the inlet and / or outlet it is recommended to increase the inlet distance to 10 times the nominal size of the flowmeter (10xDN).
  - If there are sensible differences in nominal sizes, it is recommended to increase the inlet distance to 10 times the nominal size of the flowmeter (10xDN).
  - For use with gases, it is recommended to increase the inlet distance to 5 times the nominal size of the flowmeter (5xDN).
- 3) With liquid media, isolating or control valves may be mounted both upstream or downstream the flowmeter
- 4) With gaseous media, control valves are recommended to be mounted downstream the flowmeter
- 5) All control valves must be open slowly and gradually due to the high sensitivity of the float to flow variations
- 6) Unscrew the union nuts 4.
- 7) Push the union nuts 4 onto the pipes.
- 8) Solvent cement, weld or screw the inserts 5 onto the pipes.
- 9) Insert the O-rings 6 into the metering tube.
- 10) Place the metering tube 1 between the pipes and screw it in tight with the union nuts 4.

## **WARNINGS**

Float may fall out!  
Float may get damaged  
Carefully unscrew the union nuts  
Metering tube and float must be clean and free from harmful substances  
Dust protection caps and transportation protection must be removed  
Pipelines must be aligned and installed without any mechanical stress  
The flow is from bottom to top  
Pipeline vibrations can damage the flowmeter  
The media pressure has to overcome the pressure loss at the float

## MICROSWITCH

FS-FC Microswitch

### OPERATING MODE:

The bistable limit switch type are clamped on the external guide of the flowmeter tube.

The passage of the magnetic floater activates the contact.

### TECHNICAL FEATURES:

- Bistable operating mode
- High resistance to vibrations
- Total absence of feedback effects
- Total absence of interferences in relation to a supplementary limit switch
- Inertia reduced to a minimum
- Electrical protection: IP 65
- Easy connection
- Special version provided with TRIAC is available.

| Technical Data                |                                   |
|-------------------------------|-----------------------------------|
| Contact Material              | Rhodium with inert protective gas |
| Max operating power           | 10 Watt, 12 VA                    |
| Max operating voltage         | 250 V AC/DC                       |
| Contact resistance            | 0.1 Ω                             |
| Contact insulation resistance | 1011 Ω                            |
| Closing time                  | 2 ms                              |

| <b>R</b>         | Nominal thread size in inches   |
| <b>S</b>         | Thickness series = $\frac{SDR-1}{2}$  |
| <b>s</b>         | Pipe thickness in mm  |
| <b>SDR</b>       | Standard dimension ratio = d / s  |
| <b>Sp</b>        | Flange thickness on flanged valves  |
| <b>U</b>         | Number of flange holes for flanged valves   |

# Conditions of Supply

- **INTRODUCTORY STATEMENT:** our supplies include the products specified in our Sales confirmation and are governed by the following Terms and Conditions which the Customer declares to understand and to accept, except for possible derogations stated in an explicitly written agreement. In particular all foreign supplies will be governed by INCOTERMS, as defined by the International Chamber of Commerce.
- **PRODUCTS:** to prevent regrettable misunderstandings, **it is advisable to refer to the nomenclature and codes of our catalogues and/or price lists** for the identification of our products. The items featuring an asterisk (\*), though currently on hand, are not included in our wide range of products for which stock rebuild is scheduled. Therefore our order acceptance depends upon the actual availability of the product.
- **PACKAGING:** to speed-up delivery and to facilitate warehousing at the Customer's, we reserve the right to convert the ordered quantities into multiples of the standard packages, as shown in our price list next to each item.
- **MINIMUM PURCHASE:** for orders involving a net amount of less than € 516,46 we will charge € 31 as partial recovery of the handling costs.
- **PRICES:** prices will be those in force at the time when the order was placed, except in case of forward delivery. In the latter case, the prices in force at the time of shipment will be invoiced. Our prices include normal packing; special packing, if required by the customer will be charged at cost price.
- **DELIVERY:** delivery is intended ex our Warehouse or Stores and is normally prompt, subject to being unsold. The anticipated delivery terms for unavailable items will be indicated, but these will be in no way binding or firm. If these delivery schedules cannot be kept for any reason whatsoever, the Purchaser can cancel the order only if the delay exceeds three months from the anticipated delivery date stated in our Order Confirmation. After this time lapse, we too shall be entitled to cancel any orders for items which delayed deliveries due to serious production problems.
- **SHIPMENT:** if the mode of shipment is not specifically indicated by the Customer, shipment will be effected as deemed most suitable by us. Even if the goods are sold free to destination, their transport will be at the Customer's risk. Insurance coverage will only be effected if specifically requested by the Customer.
- **PAYMENT:** the Customer cannot, for any reason whatsoever, defer payments beyond the established dates. Furthermore, we shall be fully entitled to charge interests in arrears on any and all delayed payments. These interests will be based upon the discount rate in force at that time in Italy, plus 3 unit %.
  - Unless otherwise specified, payments shall be made by opening of an irrevocable credit at call (for Foreign Countries).
  - Unless otherwise specified, payment shall be telegraphic transfer not later than 30 days after the date of invoicing (for Italy)
- **OWNERSHIP CLAUSE:** the products supplied by us will remain our property until fully paid for.
- **GUARANTEE CLAUSE:** we guarantee the good quality of our products in compliance with the standards publicized in our catalogues. However, our guarantee is limited to the repair and/or replacement of our materials, excluding any other liability, in particular for damages caused in any way whatsoever by utilization of our products. This guarantee terminates and will be no longer valid:
  - one year after the delivery of the material in question;
  - if the material is used in other way than the operating conditions specified by us;
  - if the materials are modified by people not belonging to our Company. On this subject, it is should be noted that the Purchaser will incur all liabilities provided by Law for any modification of our products.
- We shall be duly informed about any accidents in which our products are involved and such accidents shall be reported to us immediately and within 24 Hours of their occurrence.
- **CLAIMS:** only complaints/claims reaching us by registered letter within 30 days after invoicing date will be taken into consideration. In particular, we will not accept any materials returned to us, unless their reshipment - free at our warehouses - has been duly authorized by our appropriate executive.
- **DISPUTES:** any disputes which cannot be amicably settled or settled by a court of arbitration, shall be handled by the Court of Genoa which will have jurisdiction.
- **CUSTOMER SERVICE:** our Technical and Commercial Services are available to all our Customers to provide any information on the characteristics and application sectors of our products.

The above General Terms and Conditions may be changed without previous notice.

All information contained in this collection are given in good faith and are correct at date of publication thereof.

The drawings and photographs contained in this price list are provided for illustrative purposes.
